

Argonity Company Profile & Content Kit

To build a strong brand, you need consistent content for your website, social media, and client proposals. Since you specialize in high-performance web, mobile, and desktop solutions, here is a structured "Content Kit" for Argonity.

1. The Core Identity

Tagline: "Engineering Digital Excellence."

Mission: To transform complex business challenges into seamless digital experiences through cutting-edge software development.

About Us: Argonity is a full-service software creation company dedicated to building scalable, secure, and intuitive solutions. From cross-platform mobile apps to enterprise-level web systems and robust Windows applications, we bridge the gap between vision and reality using the industry's most powerful tech stacks.

2. Service Offerings

Use these descriptions for your "Services" page:

Web Development

We build fast, SEO-optimized, and scalable websites tailored to your business goals.

- **Technologies:** PHP/Laravel, Node.js, Express.js.
- **Frontend:** React.js, Next.js.
- **Stacks:** Full MERN Stack (MongoDB, Express, React, Node).
- **CMS:** Custom WordPress development and optimization.

Mobile App Development

High-performance apps for iOS and Android from a single codebase.

- **Frameworks:** Flutter, React Native.
- **Cloud Backend:** Supabase, Firebase.
- **Features:** Real-time chat, push notifications, and offline sync.

Windows & Desktop Solutions

Custom software built specifically for the Windows environment.

- Technologies: C#, .NET, ASP.NET Core.
 - Focus: Enterprise tools, database management, and high-performance desktop utilities.
-

3. Key Projects (Sample Portfolio)

Here are 10 sample project descriptions you can use to show your expertise:

1. **Butter Daisy Chat:** A cross-platform real-time messaging app built with Flutter and Supabase, featuring instant media sharing and end-to-end encryption.
 2. **Argonity Enterprise Dashboard:** A high-speed administrative panel created with the MERN Stack and Tailwind CSS for real-time data visualization.
 3. **LaraCommerce:** A robust E-commerce engine built on Laravel with integrated payment gateways and advanced inventory management.
 4. **Heart-QR System:** A custom Node.js application that generates unique, trackable QR codes linked to a MongoDB backend for marketing analytics.
 5. **QuickProperty Portal:** A real-time real estate listing platform using React and Firebase for instant lead notifications.
 6. **AutoBill POS:** A lightweight Windows Desktop application built with ASP.NET and SQLite for offline retail billing.
 7. **FlexiSocial:** A niche social networking mobile app developed in React Native, utilizing Node.js for high-concurrency user interactions.
 8. **GovTrack Pro:** An enterprise-grade document tracking system for Windows environments built using the .NET framework.
 9. **Argonity CMS:** A highly customized WordPress headless architecture using React as the frontend for lightning-fast page speeds.
-

4. Marketing Slogans (For Social Media)

- "Your vision, our code. Let's build something great together. #Argonity"

- "From Flutter to Laravel—Argonity masters the stack so you can master your business."
- "Real-time solutions for real-world problems. Discover the Argonity advantage."

5. Why Choose Argonity? (The Competitive Edge)

- **Multi-Platform Mastery:** Whether it's Web, Mobile, or Windows, we have the expertise.
 - **Real-Time Focused:** Specialists in Socket.io, Supabase, and live data streaming.
 - **Scalable Architecture:** We don't just write code; we build systems that grow with you.
-

Would you like me to generate a "Contact Us" email template that you can use to send to potential clients when you finish a project?

Setting the right price is critical for **Argonity** to remain competitive while reflecting your high-end tech stack (MERN, Flutter, .NET). In 2026, pricing in Myanmar for software services generally falls into three tiers: **Budget (Local)**, **Standard (Regional)**, and **Premium (International)**.

Based on current market data, here is a recommended pricing structure for your services.

1. Web Development (Laravel, PHP, MERN)

Project Type	Complexity	Estimated Price (MMK)	Estimated Price (USD)
Simple Landing Page	HTML/CSS or WordPress	5 - 15 Lakhs	\$250 - \$600
Basic Web App	PHP/Laravel or Express	15 - 40 Lakhs	\$600 - \$1,800
Full MERN Platform	Custom React + Node.js	45 - 120 Lakhs	\$2,000 - \$5,000+
E-commerce System	Advanced Logic + Payment	60 - 150 Lakhs	\$2,500 - \$7,000+

2. Mobile App Development (Flutter, React Native)

Project Type	Infrastructure	Estimated Price (MMK)	Estimated Price (USD)
App MVP	Firebase / Basic Auth	30 - 60 Lakhs	\$1,200 - \$2,500
Standard App	Supabase + API Integration	65 - 180 Lakhs	\$3,000 - \$8,000
Complex App	Real-time Chat + AI + Maps	200+ Lakhs	\$10,000+

3. Windows Desktop & Enterprise (.NET, C#)

Project Type	Environment	Estimated Price (MMK)	Estimated Price (USD)
Internal Utility	Offline C# Tool	15 - 30 Lakhs	\$600 - \$1,300
Enterprise ERP/CRM	ASP.NET + SQL Server	80 - 250 Lakhs	\$3,500 - \$11,000

4. Hourly Rates for Maintenance & Consulting

If you charge by the hour for smaller updates or technical support:

- **Junior/Standard Support:** \$15 – \$25 / hour
- **Senior Development (MERN/Flutter):** \$30 – \$55 / hour
- **Architectural Consulting:** \$60+ / hour

5. Why these prices?

- **Myanmar Discount:** Your rates are significantly lower than Singapore or US agencies (who charge \$100+/hr), making you very attractive for international outsourcing.
- **Maintenance Fee:** Always suggest a monthly maintenance fee of **15% – 20%** of the original project cost per year to cover hosting, security patches, and small updates.
- **Fixed vs. Variable:** For clear projects (like a basic Laravel site), use **Fixed Pricing**. For complex, evolving apps (like a Flutter chat app), use **Milestone-based Pricing**.

Pro-Tip: When quoting a price to a local Myanmar client, it is often better to quote in **Lakhs (MMK)**, but for international clients, always quote in **USD** to protect yourself from currency fluctuations.
